

Test Case	Exception?
p="abc", s=""	Yes/No
p="", s="abc"	Yes/No
p="", s=""	Yes/No
p="abc", s="xyz"	Yes/No
p="abcdef", s="a"	Yes/No

BEST SUBSEQUENCE OF Y IN X -
FRONT TRUNCATION

NO EXCEPTION HANDLING REQUIRED

But requires correctness for outputs not consistent with
Length maximum subsequence: 0

Exception occurred but related to array storage size due to
large permutations

A simple if condition will ensure no
data will be shown
(maximumSubsequenceLength == 0

```
-----LONGEST SUBSEQUENCE (STRING Y IN STRING X)
x index(0-0) is a substring(String X)      subsequence permutation (String Y): acb  Window size: 1
Following characters unmatched:
Length maximum subsequence: 0
Presented window (String X):
Subsequence:
Subsequence (index on String Y):
```
